

# MINIMISE BUSINESS INTERRUPTIONS BEFORE INCIDENTS HAPPEN

**DAMAGE AND LOSSES OFTEN CATCH YOU OFF GUARD. WHAT MATTERS IS RESPONDING SWIFTLY AND TAKING THE APPROPRIATE ACTIONS.**

## YOUR ADVANTAGES WITH RED ALERT®

- ✓ **The moment you experience damage, we are there to make it undone**  
For any type of business interruption – whether caused by natural disasters, fire/explosion, or machinery/equipment breakdown failure – our qualified processes ensure an effective response.
- ✓ **You receive priority handling even in the event of a natural disaster – guaranteed**  
Even if local or regional disasters exceed the available resources, we guarantee we will directly approach you.
- ✓ **The extent of the damage is minimised, and your business downtime is shortened**  
BELFOR is there, the moment you need us, with a guaranteed on-site presence and with the necessary workforce within the required timeframe. This reduces both business downtime and damage-related costs.
- ✓ **Your reputation is safeguarded, and regulatory risks are minimised**  
RED ALERT® ensures that restoration aligns with compliance and government regulations.
- ✓ **C-level executives are better protected from potential liabilities**  
RED ALERT® supports your Directors & Officers (D&O) coverage in the event of a loss. By ensuring that all mandatory restoration measures are implemented swiftly and professionally, we help minimise board-level liabilities.
- ✓ **CSRD: RED ALERT® can be declared as a direct measure**  
As part of the CSRD risk assessment, companies must document risks arising from environmental factors. RED ALERT® serves as a measure to counter such risks, thereby reducing the extent of financial damage.
